1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The financial statements were prepared in accordance with Canadian accounting standards for not-for-profit organizations.

Capital assets

The Foundation has adopted a policy whereby capital assets costing \$2,000 or more will be included in the statement of financial position at cost and amortized over their expected useful life. Capital assets costing less than \$2,000 will be expensed in the year of purchase.

Use of estimates

The preparation of financial statements in accordance with Canadian accounting standards for not-for-profit organizations requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

Financial instruments policy

Financial instruments are recorded at fair value when acquired or issued. In subsequent periods, equities, bonds and derivatives traded in an active market are reported at fair value, with any unrealized gains and losses reported in operations. All other financial instruments are reported at cost or amortized cost less impairment, if applicable. Financial instruments are tested for impairment when changes indicate the instrument(s) could be impaired. Transaction costs on the acquisition, sale, or issue of financial instruments are expensed for those items remeasured at fair value at each statement of financial position date and charged to the financial instrument for those measured at amortized cost.

7. FINANCIAL RISKS AND UNCERTAINTIES

The Foundation relies on its Board to manage financial risk.

Credit risk

The Foundation is exposed to credit risk resulting from the possibility that parties may default on their financial obligations. The Foundation does not hold directly any collateral as security for financial obligations of counterparties.

The maximum exposures that the Foundation had to credit risk as of December 31, 2022 and 2021 were as follows.

	2022	2021
Cash	\$ 511,543	\$ 371,425
Accounts receivable	461	6,818
Long term investments	4,967,636	5,340,616
	\$ 5,479,640	\$ 5,718,859

Credit risk associated with cash and long term investments is minimized by ensuring that the funds are invested with credit worthy financial institutions. The investment portfolio listed in note 3 is professionally managed by The Winnipeg Foundation. No single investment represents a material amount of the total portfolio.

Liquidity risk

Liquidity risk is the risk that the Foundation will not be able to meet a demand for cash or fund its obligations as they become due. The Foundation meets its liquidity requirements by monitoring cash flows and cash balances throughout the year and holding assets that can readily be converted to cash.

Other price risk

The Foundation is exposed to other price risk on fixed interest rate investments managed by The Winnipeg Foundation. A rise in market interest rates will result in a decrease in the fair values of bonds and debentures.

Currency risk

The Foundation is exposed to currency risk on investments managed by The Winnipeg Foundation held in non-Canadian currency. It is likely that approximately 30% of the investment portfolio was held in foreign currency as of December 31, 2022 (2021 - 35%) based upon audited financial statements for The Winnipeg Foundation.
